OFFICIAL LANGUAGE : English
The International Symposium on Inorganic and Environmental Materials 2013 (ISIEM 2013) will be held at the University of Rennes 1 in France from October 27 (Sunday) – 31 (Thursday), 2013. This international conference is organized by the Society of Inorganic Materials, Japan (SIMJ) and University of Rennes 1, France (UR1). In 2004, SIMJ organized ISIEM 2004 with the Dutch Ceramic Society (Nederlandse Keramische Vereniging/NKV) in Eindhoven, the Netherlands. That conference was a success, drawing about 250 participants. ISIEM 2013 is a successor of ISIEM 2004. We will organize the symposium where the newest research and technologies on inorganic materials related to our theme of “gypsum, lime, cement, and the global environment” will be brought forth and discussed.

We also hope that this event will draw participants from many countries, and that it will provide an opportunity for researchers in the fields of inorganic and environmental materials, and nanomaterials to gather under one roof and deepen their understanding.

We sincerely hope you will attend ISIEM-2013.
